

WEBOOST RV50

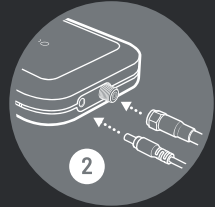

QUICK START

FOR LARGE-SIZE RVs UP TO 50ft

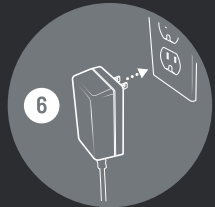

Mount the Outside Antenna

To prevent oscillation, maintain a minimum distance of 15-20 feet horizontally and 5 feet vertically between the inside and outside antennas.

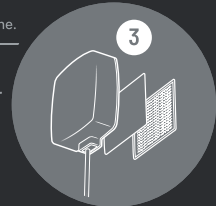

Connect Outside Antenna Cable & Power Cable to Booster

Plug into 120v wall outlet

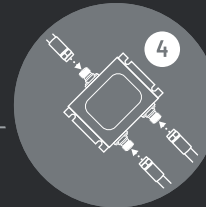

Connect single Cable from Splitter input to the Booster

Mount the Inside Antennas in front and back of RV for full coverage

Ideal location to mount the inside antennas are the ceiling at centerline.

Connect the 2 Inside Antenna Cables to the provided Splitter and connect single Cable to run from Splitter to Booster
