

NITROGEN TOOLS

MalcoEdge™ nitrogen tools give HVACR technicians reliable, repeatable control over pressure testing and brazing prep. Built with solid brass construction and matched components, these tools handle daily jobsite wear while keeping nitrogen flow and pressure exactly where you want them.

NPT

NITROGEN PURGE TOOL

The MalcoEdge™ NPT Nitrogen Purge Tool lets technicians switch instantly between PURGE, BRAZE, and OFF settings to maintain consistent nitrogen flow while brazing refrigerant lines. Solid brass construction is built to handle the drops and rough handling that come with daily use in a tool bag, and it connects directly to the NRHD Nitrogen Regulator and 1/4" hoses for a complete setup.

NRHD

NITROGEN PRESSURE REGULATOR

The MalcoEdge™ NRHD Nitrogen Pressure Regulator delivers reliable, repeatable pressure control for pressure testing and nitrogen charging. Large dual gauges with rubber protective boots stay readable and protected, while solid brass piston construction is designed to remain attached to the nitrogen bottle between uses.

- Brass Piston Valve
- Dual Gauges w/ Rubber Boots
- 3000 psi Max Inlet Pressure
- 725 psi Max Outlet Pressure
- CGA-580 Bottle Connection
- Stays Mounted Between Uses

NPK1

NITROGEN PURGE KIT

The MalcoEdge™ NPK1 Nitrogen Purge Kit pairs the NPT Purge Tool and NRHD Regulator in one protective hard case, giving technicians a complete nitrogen purging and pressure testing setup in a convenient carrying package.

- Includes NPT + NRHD
- Protective Hard Case
- Matched, Ready-to-Use Set

COMPLETE YOUR PURGE SETUP WITH MALCOEDGE HOSES

Choose Safe Seal or Easy Seal hoses for safe, secure, leak-resistant connections on your purging jobs.

SAFE SEAL HOSES

EASY SEAL HOSES
