

# CORE REMOVAL TOOLS

Core removal tools are a staple in every HVACR trade pro's kit — from daily service work to occasional repairs. MalcoEdge™ Core Removal Tools remove valve cores to speed up evacuation, recovery, and charging, with features like sight-glass verification and independent dual-valve control for techs who want more visibility and control over the process.

## HI-FLOW CORE REMOVAL TOOL - DUAL VALVE WITH SIGHT GLASS

### TOOL KIT INCLUDES

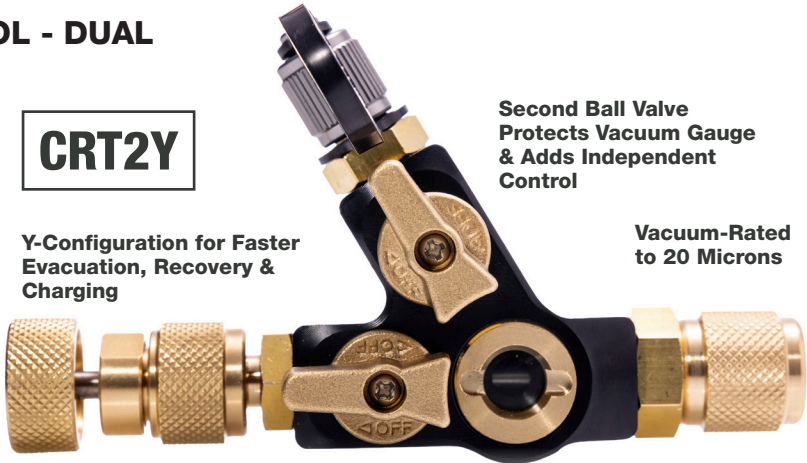

- CRT2Y Core Removal Tool
- Swappable 5/16" F Port Fitting
- 3/8" M Port Adaptor
- Protective Hard Shell Case

CRT2Y

Y-Configuration for Faster Evacuation, Recovery & Charging

Magnetic Capture Rod Knob for Easy Access During Service

Integrated Sight Glass Confirms Core Capture

Second Ball Valve Protects Vacuum Gauge & Adds Independent Control

Vacuum-Rated to 20 Microns

High-Pressure Rated to 800 psi (55 bar)

CRT1

CRT3

## COMPACT SINGLE VALVE CORE REMOVAL TOOLS

The compact single valve core removal tools remove valve cores from their service ports to open up flow during evacuation and recovery. They feature a magnetic capture rod knob that attaches to any magnetic surface, keeping it within easy reach during service and the compact body fits access points larger core tools can't.

- Compact design for tight spaces
- Magnetic knob on capture rod for easy access
- Pairs with the entire family of MalcoEdge Adapters and Vacuum Rated Fittings
