

FLARE NUT TORQUE WRENCHES

MalcoEdge™ Flare Nut Torque Wrenches apply accurate, pre-set torque to flare fittings without batteries, calibration, or guesswork. Fully mechanical and rated for wet conditions, they help prevent the over- and under-tightening that leads to refrigerant leaks and callbacks.

SINGLE FLARE NUT TORQUE WRENCHES

Catalog #	Flare Nut Size	Hex Size	Preset Torque Values (ft-lb ± Tolerance)
RTW250	1/4"	5/8"	13.3 ft-lb ± 1.5
RTW375	3/8"	13/16"	28 ft-lb ± 1.5
RTW500	1/2"	15/16"	40.6 ft-lb ± 4.5
RTW625	5/8"	1-1/16"	55 ft-lb ± 5

RTWK

FLARE NUT RATCHETING TORQUE WRENCH KIT

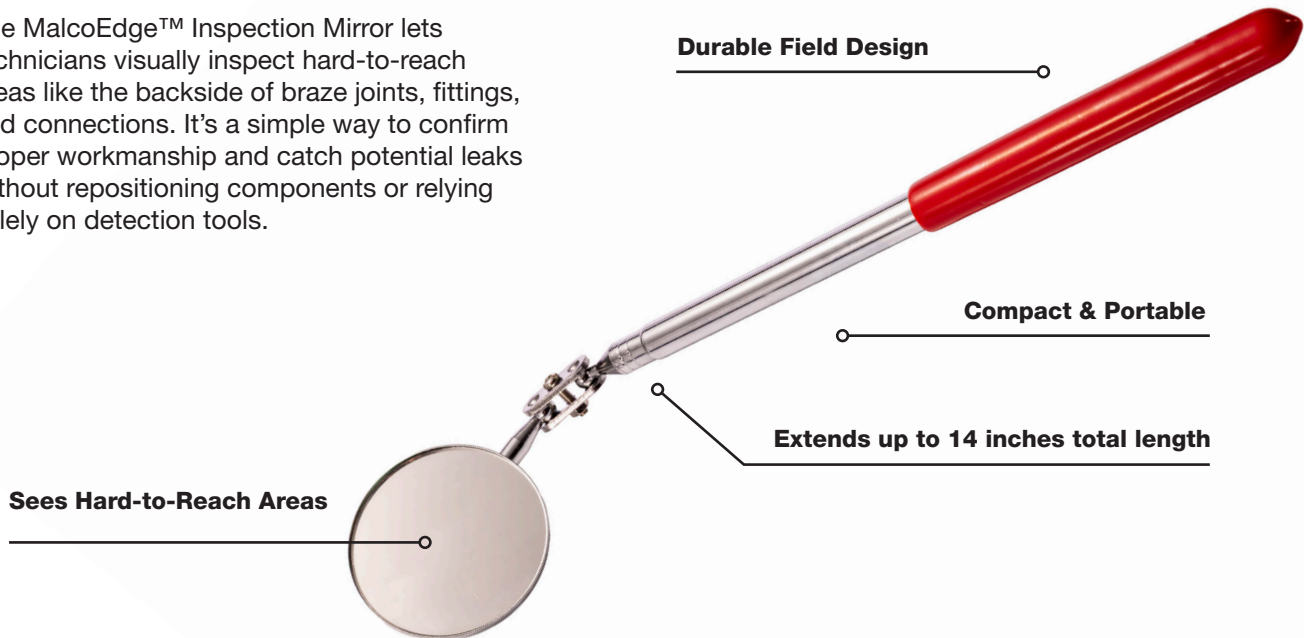

The MalcoEdge™ RTWK Kit combines all four Flare Nut Torque Wrenches in one carrying case, so technicians have the right pre-set torque wrench on hand for 1/4", 3/8", 1/2", and 5/8" flare nuts without digging through a tool bag.

- Includes All 4 RTW Sizes
- Carrying Case Included
- Fully Mechanical
- Ratcheting Heads

**IM1****INSPECTION MIRROR**

The MalcoEdge™ Inspection Mirror lets technicians visually inspect hard-to-reach areas like the backside of braze joints, fittings, and connections. It's a simple way to confirm proper workmanship and catch potential leaks without repositioning components or relying solely on detection tools.

**GP1****GASKET PICKER**

The MalcoEdge™ Gasket Picker removes worn or damaged gaskets and O-rings from hoses, fittings, and tools where fingers can't reach. Its compact design fits confined spaces, and a twist-off handle cap holds spare gaskets for quick replacement on the job.
