

Track your pet's seizures, all in one place

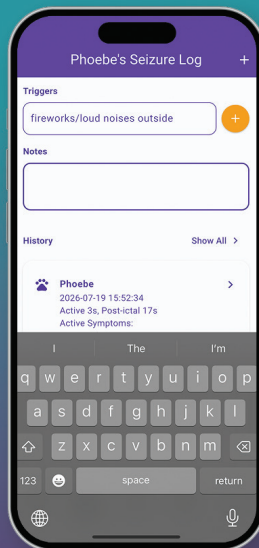

Piece of Mind is a free app that helps you keep a detailed history of your pet's brain health. You can log seizures in real time, capture video to show your vet, and get medication reminders so you don't miss doses or refills. Beyond that, it's a way to help you feel more in control of their seizures and improve your quality of life together.

1. Record seizure

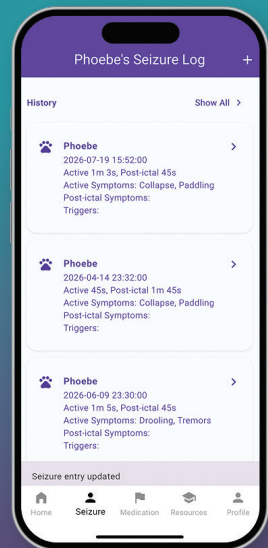

Record a seizure as it happens, or upload a video from your phone

2. Add notes

Jot down anything that seemed off beforehand

3. Share it

Bring your logged history to every vet visit

Want more features? Purchase Piece of Mind Plus for access to additional capabilities like emergency protocols, health updates, nutritional management tips, and pet sitter mode.
